SUMMARY

Full-stack engineer with 3+ years of experience delivering search-centric web and mobile platforms in React, React Native, Node.js, and TypeScript, driving product requirements into scalable architectures. Strong communication, leadership, and decision-making skills with the ability to guide teams, resolve conflicts, and align technical work with business goals while maintaining collaboration and accountability.

EXPERIENCE

Auto.tj

November 2025 – Present

Backend Developer

Full-time

- **Technologies:** React, React Native, Node.js, Next.js, Elasticsearch, PostgreSQL, SQLite, TypeORM, TypeScript
- Implemented Elasticsearch to deliver a high-performance type-as-you-search experience, significantly improving search speed and user interaction across the platform.
- Designed and built the vehicle catalog data architecture, defining the structure that supports filtering, search, and scalable data management.
- Developed and structured Next.js routing, mapping routes to the appropriate frontend components for better maintainability and clear navigation flow.
- Refactored the messaging system logic by moving key responsibilities to the frontend, improving data flow, reducing backend load, and simplifying state management.
- Provided technical guidance to teammates on frontend architecture and logic, ensuring consistency with the overall system structure and improving development efficiency.

Secret

February 2024 – October 2025

Full-Stack Developer

Full-time

- **Technologies:** React, React Native, Node.js, PostgreSQL, SQLite, TypeORM, TypeScript, Web3
- Built the backend for an Ethereum-based crypto wallet similar to MetaMask.
- Implemented wallet logic for balance checking, and transaction handling.
- Worked with Ethereum blockchain data using Etherscan APIs, handling on-chain/off-chain data and other crypto-related endpoints.
- Integrated backend wallet services with the frontend application for real-time wallet interaction.
- Handled core Web3 features such as transaction flow, wallet communication, and blockchain data usage.

DHL - IT Services

June 2022 – December 2023

Application Support Engineer (Frontend Developer)

Full-time, Prague

- Provided second-line frontend support for an internal ServiceNow portal, handling Incident and Problem management workflows across multiple business units
- Diagnosed and resolved UI/UX defects in production, refactoring vanilla JavaScript modules within ServiceNow to improve maintainability
- Reverse-engineered and documented microservice workflows in ServiceNow to accelerate root-cause analysis on cross-team incidents
- Coordinated directly with external vendors and internal engineering to resolve integration issues end-to-end

EDUCATION

Unicorn University, Prague

Graduated 2024

Bachelor of Science, Software Engineering – Faculty of Information Technology

Prague, Czech Republic

SKILLS

Languages: TypeScript, JavaScript (ES6+), C/C++

Frameworks: React, React Native, Next.js (SSR/SSG), Node.js

Backend & Database: Elasticsearch, PostgreSQL, SQLite, TypeORM

Tools: Docker, Webpack, Material UI, Styled Components (CSS-in-JS), Figma, Git/GitHub, Jira, Cypress, Jest, React Testing Library

Spoken languages: Tajik (Native), Russian (Native), English (C1)
